

Call for paper NTHAS 12 JOINT SEMINAR *for students and young researchers*

In advance of NTHAS12, a student seminar providing a playground for learning, information exchange and human networking will be held in Tokyo on November 6-8, 2020. The researchers and engineers in the next generation are welcomed. The students attending the seminar will have a chance to learn the most advanced and up-to-date information about the nuclear thermal-hydraulics, as well as a privilege to expand human network through seminar activities. The detailed information will appear at the symposium website.
