

Call for paper NTHAS 12 JOINT SEMINAR *for students and young researchers*

A three-day student seminar takes place in prior to NTHAS12. The seminar provides a playground for learning, information exchange, and human networking. We welcome the researchers and engineers in the next generation. The students attending the seminar have an opportunity to learn the most advanced and up-to-date information about nuclear thermal-hydraulics, as well as the privilege to expand the human network through seminar activities. The detailed information will be available on the symposium website.
